FOR ENTERAL USE ONLY - NOT FOR IV USE
- Assure that set is connected *only* to an enteral feeding tube
- To avoid product contamination problems, this set should be replaced at least every 24 hours, or as needed
- For single patient use only
- Do not store for prolonged periods at extreme temperatures
- Do not use water at extreme temperatures in set

For more information, contact your Abbott Nutrition Representative or visit [www.abbottnutrition.com](http://www.abbottnutrition.com)
Product Information:
Companion® Enteral Feeding Pump and Pump Sets
Companion® Enteral Feeding Pump and Pump Sets

- Feeding sets are DEHP-free and latex-free
- Cassette is designed to prevent accidental product free-flow due to improper set loading
- Lightweight pump fits into an ambulatory carrier to eliminate the need for an IV pole, if desired
- Use of a pressure sensor, rather than a drop sensor, is designed to help reduce false alarms due to overfilled sight chamber, condensation, or drops clinging to inside of sight chamber
- Easy-to-load cassette snaps in—no threading, looping, or wrapping of tubing
- Flow rates of 5 to 300 mL/hr in 1-mL increments

Important Safety Information When Using the Companion Enteral Pump and Pump Sets

- THIS PUMP IS FOR ENTERAL USE ONLY - NOT FOR IV USE
- Confirm proper placement and function of patient’s enteral feeding tube (nasogastric, jejunostomy, gastrostomy, etc) and verify the following before initiating feeding:
  - 1. Only an Abbott Nutrition Enteral Pump Set is being used
  - 2. Flow rate is set at the prescribed mL/hr
- Pump set and container should be replaced as needed, or at least every 24 hours, to avoid fluid-contamination problems.
- See Pump Operating Manual for Complete Safety Information and Instructions for Use.

Important Safety Information When Using the Ambulatory Transporter:

- Assure that set is connected only to an enteral feeding tube.
- To avoid product contamination problems, set should be replaced as needed or at least every 24 hours.
- For single-patient use only.
- Do not store for prolonged periods at extreme temperatures.
- Do not use water at extreme temperatures in set.

1 of 2
DEHP-Free, Latex-Free

Patient is scoped once during procedure

No endoscopic procedure is necessary for balloon tube removal

T-Fasteners securely affix stomach to abdominal wall for security during procedure and during stoma tract maturation

Progressively larger dilators provide gradual, efficient formation of stoma tract

The Introducer/stylet (placed inside the G-tube) allows easy introduction of the G-tube into the stoma tract

- FOR ENTERAL USE ONLY - NOT FOR IV USE
- This product is contraindicated for patients that have a nonfunctioning gut or are pregnant
- See Product Labeling for other Contraindications, Safety Information, and Instructions for Use
- STERILE—Unless plastic bag is damaged or opened
- DISPOSABLE—Intended for single-patient use only
- Store at controlled room temperature: 15-30° C (59-86° F)

Product Information:
Nasoenteric Feeding Tubes
Nasoenteric Feeding Tubes

- DEHP-Free, Latex-Free
- Y-Port Connector: No need to disconnect feeding set to flush tube or add medication
- Specially designed Interlocking Feeding Set Connector holds nasoenteric tube and feeding set together
- Open-End Feeding Port: Open end, and at least two side ports, provides good fluid flow and minimizes potential for clogging
- Flow-through stylet does not need to be removed to aspirate stomach contents or inject air
- Tubes are radiopaque and have reference markings
- Water-activated lubricant eliminates need for additional lubrication
- Premium Medical-Grade Polyurethane Material: Designed to resist kinking and collapse during aspiration of stomach contents. Strong material means thin tube walls to deliver more flow

- FOR ENTERAL USE ONLY - NOT FOR IV USE
- For single-patient use only
- See individual product labeling for Directions for Use and Important Safety Information

EnteraLite® Infinity® Enteral Pump and Pump Sets
Product Information:
EnteraLite® Infinity® Enteral Pump and Pump Sets
Feeding sets are DEHP-free and latex-free
- Automatic or manual priming
- In-line occluder for automatic free-flow protection
- Maintenance: No annual calibration required
- Cleaning: Washable under running water
- Flow Rate Range: 0.1 mL/hr — 600 mL/hr
- Accuracy: ±5%
- Dose Settings: 0.1mL—3000 mL, or infinite dose
- Ambulatory or stationary use
- Pump weighs only 0.9 lb
- Operates in any orientation
- 24-hour battery life at 125 mL/hr
- EnteraLite Infinity can meet the feeding needs of all patients due to its wide flow rate range, accuracy, and dose programming flexibility
  - Acute Care: From intensive care to rehabilitation
  - Long-Term Care: Allows caregiver to focus on other areas of care and improves compliance to feeding schedules
  - Home Care: Easy-to-use and durable

- **THIS PUMP IS FOR ENTERAL USE ONLY - NOT FOR IV USE**
  - Pump set and container should be replaced as needed, or at least every 24 hours, to avoid fluid contamination problems.
  - See Pump Operating Manual for Complete Safety Information and Instructions for Use

Product Category: Patrol®

Patrol® Enteral Feeding Pump and Pump Sets

For more information, contact your Abbott Nutrition Representative or visit www.abbottnutrition.com

© 2013 Abbott Laboratories Inc.
Updated 2/5/2013

Abbott Nutrition Abbott Laboratories
Columbus, OH 43219-3034
1-800-227-5767
Product Information:
Patrol® Enteral Feeding Pump and Pump Sets
Feeding sets are DEHP-free and latex-free
Safe-T-Valve on feeding sets are designed to protect against runaway feeding if set is improperly loaded or becomes dislodged from pump
Free-Flow Alarm: Stops flow and alerts caregiver to free-flow condition when set is properly loaded
Smart Pump: Dial settings designed to take the guesswork out of pump programming—making operation easy to learn, easy to use, and easy to teach
Programmable Hold: If caregiver desires HOLD for other than 5 minutes for patient care, another interval (1 to 90 minutes) may be selected
Lockout Features: Allows caregiver to temporarily disable SET RATE, SET DOSE, and CLEAR VOLUME dial settings to prevent unauthorized or accidental changes

- **THIS PUMP IS FOR ENTERAL USE ONLY - NOT FOR IV USE**
- Confirm proper placement and function of patient's enteral feeding tube (nasogastric, jejunostomy, gastrostomy, etc) and verify the following before initiating feeding:
  1. Only an Abbott Nutrition Enteral Pump Set is being used
  2. Flow rate is set at the prescribed mL/hr
- Pump set and container should be replaced as needed, or at least every 24 hours, to avoid fluid-contamination problems.
- See Pump Operating Manual for Complete Safety Information and Instructions for Use.

Product Category: Quantum

Flexiflo® Quantum™ Enteral Feeding Pump and Pump Sets
Product Information:
Flexiflo® Quantum™ Enteral Feeding Pump and Pump Sets
Feeding sets are DEHP-free and latex-free.

Automatic set priming allows the nurse to perform other duties while priming takes place. Manual priming is available but is optional.

Feeding Cassette: Designed to prevent accidental free flow of formula due to improper set loading.

Ultrasonic Flow Sensing: Designed to help reduce false alarms.

Easy Setup: Dial and display panel instructions are clear and simple, so staff, patients, or family members can easily learn their use. The cassette fits easily into place, eliminating the need to thread, loop, or wrap tubing.

Memory Retention: While on AC power, RATE, VOLUME FED, and DOSE values are retained—even when the pump is turned off.

Programmed Dose: A feeding dose can be programmed so the pump stops feeding when preset dose has been delivered.

- **THIS PUMP IS FOR ENTERAL USE ONLY - NOT FOR IV USE**
- Confirm proper placement and function of patient's enteral feeding tube (nasogastric, jejunostomy, gastrostomy, etc) and verify the following before initiating feeding:
  - 1. Only an Abbott Nutrition Enteral Pump Set is being used
  - 2. Flow rate is set at the prescribed mL/hr
- Pump set and container should be replaced as needed, or at least every 24 hours, to avoid fluid-contamination problems.
- See Pump Operating Manual for Complete Safety Information and Instructions for Use.

Product Category: Screw Cap Feeding Sets

Screw Cap Feeding Sets
Product Information: Screw Cap Feeding Sets
Screw Cap Feeding Sets

- Feeding sets are DEHP-free and latex-free
- Eliminates the need for separate spiking when using Abbott Nutrition rigid ready-to-hang containers
- Redesigned stepped adapter further mitigates the risk of connection to a standard rigid luer system
- The Universal Screw Cap Connector is designed for utilization with Abbott Nutrition pumps and Screw Cap Sets with containers featuring a SPIKERIGHT™ port

  - **FOR ENTERAL USE ONLY - NOT FOR IV USE**
  - Assure that set is connected **only** to enteral feeding tube
  - To avoid product contamination problems, this set should be replaced at least every 24 hours, or as needed.
  - For single-patient use only
  - See individual Product Labeling for Directions for Use and Important Safety Information
