The Next Generation Immune-Enhancing Formula

**Pivot™1.5 Cal**

- Suggested Use
  - Start Pivot™1.5 Cal full strength at 25 mL/hr as soon as possible after ICU admission.
  - Increase by 25 mL/hr every 8 hours until goal rate is reached.
  - Continue at the goal rate as tolerated.

**Availability**

- **Formula:** Pivot™1.5 Cal
- **Series:** Macro III
- **Calorie Density:** 25% of Calories
- **Carbohydrate:** 5 g
- **Fat:** 2 g
- **Protein:** 1.5 g
- **Arginine:** >12 g/L
- **Structured Lipid:** 5 g/L
- **Soluble Fiber:** 4 g/L

Specialized, Very-High-Protein Nutrition

IEFs have been shown to benefit these patients:

- Trauma
- Head injury
- Multiple fractures
- Wounds
- Malnourished
- Immunosuppressed

Suggested Use

- Continue tube feeding Pivot™1.5 Cal until goal rate is reached.
- Increase by 25 mL/hr every 8 hours until goal rate is reached.
- Continue at the goal rate as tolerated.

**Comparision of Selected Products**

- **Immune-enhancing formulas (IEFs)** are associated witharginine, FOS and structured lipids for metabolic stress.

**Order Pivot™1.5 Cal**—The next generation immune-enhancing formula.

**Immune-Enhancing Formulas**

- The next generation immune-enhancing formula.

**Pivot™1.5 Cal**

- Suggested Use
  - Start Pivot™1.5 Cal full strength at 25 mL/hr as soon as possible after ICU admission.
  - Increase by 25 mL/hr every 8 hours until goal rate is reached.
  - Continue at the goal rate as tolerated.
