

Dear Patient or Caregiver:

Abbott Nutrition is currently in the process of transitioning its 8 oz. can adult product portfolio to the New ARC™: Abbott Recloseable Container by Tetra Pak®.

Please know while the packaging is being updated to better serve you, there is no formula or ingredient change and the product is still the *same* quality you expect from Abbott Nutrition.

For more information about the new ARC: Abbott Recloseable Container or label, visit www.engage.abbott.

- The new ARC container is easy to open and easy to use, it's recloseable and compared to metal cans, has a lower environmental impact.
- In a recent focus group study, the ARC was preferred over metal cans by both healthcare professionals and patients.

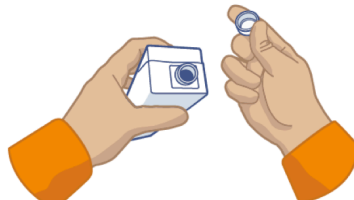

For questions and availability, please contact your supplier.

Instructions for Use

OPEN CAP TO THE LEFT

You will hear a click as the tamper evidence ring breaks.

CAP OPENS FOIL SEAL

The inner seal isn't visible but it remains attached just beneath the opening and doesn't fall into the product.

PRODUCT USAGE

Pour, consume directly from the container or through a straw.

RECLOSE CAP TO THE RIGHT

Once opened reclose, refrigerate and use within 48 hours.

When product is consumed directly from the container or through a straw, refrigerate the remaining product within 1 hour and use within 24 hours.
