You’ll nurture her big dreams.  
We’ll help nurture her growing body.
### Product Categories

#### Preterm Infants

- **Formulas**
  - Fortification options
    - For preterm or low-birth-weight infants whose feedings require fortification to meet elevated nutrient requirements.
    - For preterm infants requiring higher amounts of protein and select vitamins & minerals to promote development and catch-up growth.

#### Term Infants

- **Standard, cow’s milk-based formulas**
  - For use in infants 6 months and older as they transition to solid foods.

- **Partially hydrolyzed whey formula**
  - For initial or supplemental feeding.

- **Soy-based formulas**
  - For infants with symptoms of lactose intolerance such as fussiness, gas, and/or diarrhea. \(^{1,2}\)
  - For infants: - with IgE-mediated cow’s milk allergy where tolerance to soy has been established; - whose parents wish to provide a non-milk-based formula.

- **Hypercaloric formula**
  - For infants with increased caloric needs.

- **Hypoallergenic, extensively hydrolyzed formula**
  - For infants with allergy or sensitivity to intact protein (cow’s milk or soy).

#### Toddlers and Children 1-3 years of age

- **Sole-source nutrition or supplement**
  - For children with increased nutrient needs, who are malnourished, or failing to thrive, or at risk of such conditions.

- **Specialized peptide-based ready-to-drink formula. Sole-source nutrition or supplement**
  - For children with gastro-intestinal (GI) and/or experiencing GI symptoms such as: abdominal pain, diarrhea, constipation, nausea, and vomiting.

- **Nutritional supplement**
  - For children who require a nutritional supplement due to feeding difficulties, poor intake, or appetite suppression.

#### Specialty Products

- **Therapeutic hydration**
  - Specially formulated to help prevent dehydration by restoring vital nutrients lost during diarrhea and vomiting in infants, children, and adults.

- **Waters**
  - For initial or supplemental feeding.

- **No added carbohydrate, soy-based, iron-fortified infant formula**
  - For patients unable to tolerate the type or amount of carbohydrate in milk or conventional infant formulas, or with seizure disorders requiring a ketogenic diet.

### Features and Indications

- **Human milk fortifier**
  - Sterile liquid *(Unique to Abbott Nutrition)* Powder

- **A commercially sterile, extensively hydrolyzed liquid protein modular suitable for fortification of human milk or infant formula. *(Unique to Abbott Nutrition)*

- **Post-discharge formula, 0-12 months corrected age.**

- **Sterilized Water**

- **5% Glucose Water**

- **RCF**

### Products

- **Similac**
  - **Human Milk Fortifier Special Care® 30 (with iron)**
  - **Human Milk Fortifier**
  - **LiquiProtein™**
  - **Similac® Special Care® 20 (with iron)**
  - **Similac® Special Care® 24 (with iron)**
  - **Similac® Special Care® 24 High Protein (with iron)**
  - **Similac® Neosure® Omega-3 and Omega-6**

- **NEW Similac® Advance® Omega-3 and Omega-6 (non-GMO)**
  - **Similac® Advance® Omega-3 and Omega-6**

- **NEW Similac® Go & Grow® Omega-3 and Omega-6 (non-GMO)**
  - **Similac® Go & Grow® Omega-3 and Omega-6**

- **Similac® Isomil® with Omega-3 and Omega-6**
  - **Similac® Isomil®**
  - **Similac® Isomil®**
  - **Similac® 24 (with iron)**

- **Similac® Alimentum®**
  - **Similac® Alimentum® Omega-3 and Omega-6**

- **Similac® PediaSure®**
  - **PediaSure® Fibre**
  - **PediaSure® Plus (with fibre)**
  - **PediaSure® Peptide 1 Cal**

- **PediaSure Complete® Grow & Gain™**

### Notes

ARA = Arachidonic acid; DHA = Docosahexaenoic acid; GOS = Galactooligosaccharides.

SIMILAC® ADVANCE®
OMEGA-3 AND OMEGA-6

THE ONLY FORMULA CONTAINING
GALACTOOLIGOSACCHARIDES AND LUTEIN®

GALACTOOLIGOSACCHARIDES

The baby’s gut relies on millions of good bacteria to help support digestive health. Galactooligosaccharides can be naturally found in breast milk. They act like food for the beneficial bacteria in the baby’s intestinal tract.

WHY ARE GALACTOOLIGOSACCHARIDES IMPORTANT?
1. They may help promote the growth of beneficial bacteria in the intestinal tract.
2. They help promote softer stools, similar to breastfed babies.

LUTEIN

The baby’s first year of life is a critical time for brain and eye development. Lutein is an antioxidant naturally found in breast milk and it is concentrated in the baby’s brain and eyes.

WHY IS LUTEIN IMPORTANT?
1. It absorbs potentially damaging light.
2. It may protect against oxidative damage in the eye.

Until the baby starts solid foods like leafy greens, corn, and eggs, he can only get lutein‡ from breast milk or Similac® Advance®.

† Excluding inherent sources.
