Studies on preterm infants fed Similac NeoSure have demonstrated the following clinical outcomes:

- Excellent Catch-Up Growth†
- Improved Body Composition‡
- Improved Language Development§
- Improved Visual Development⊥, ‡, II

The use of hypo- and hypercaloric formulas should be directed by your baby’s doctor.

† Use scoop provided in Similac NeoSure can.
‡ Compared to infants fed a formula without DHA and AA in a clinical trial with Similac® Special Care® and Similac NeoSure infant formulas with iron prior to the addition of Lutein.
§ Based on a subset of infants in a post hoc analysis.
⊥ Visual acuity measured at 4 and 6 months corrected age and assessed by VEP (visual evoked potential).

How to Prepare Similac® NeoSure® Powder Infant Formula

GETTING READY

YOU MUST ADD WATER

1. Wash your hands, surfaces, and utensils.
2. Ask your baby’s doctor if you need to boil (sterilize) utensils, bottles, nipples, rings, and water for mixing before use.
3. If water has been boiled, let it cool to room temperature.

MIXING GUIDE (STANDARD DILUTION)

4. Pour 4 fl oz of water into clean bottle. Add 2 unpacked level scoops of NeoSure, using only the scoop in can, and return dry scoop to can.

5a. 2 scoops + 4 fl oz

OR

5b. Pour 6 fl oz of water into clean bottle. Add 3 unpacked level scoops of NeoSure, using only the scoop in can, and return dry scoop to can.

5a. 3 scoops + 6 fl oz

STORING FORMULA

6. Once mixed, store formula in the refrigerator right away; use within 24 hours.

STORING REMAINING POWDER

7a. Cover opened can and store at room temperature. Avoid extreme temperatures.

7b. Important: Be sure to use scoop provided in CAN. Use opened can contents within 1 month.

FEEDING BABY

8. Feed baby.

9. Once feeding begins, use formula within 1 hour or discard.
