A POSITION PAPER FROM ESPGHAN: PROBIOTICS & PRETERM INFANTS

The European Society for Paediatric Gastroenterology Hepatology and Nutrition (ESPGHAN) has published a position paper in the Journal of Pediatric Gastroenterology that includes a conditional recommendation to use the probiotic blend of Bifidobacterium lactis (BB-12), Bifidobacterium infantis (BB-02), and Streptococcus thermophilus (TH-4) when each of the strains is administered at a dose of 3.0 to 3.5 x 10⁸ cfu/g.

ALLERGY KNOWLEDGE HUB

According to Food Allergy Research & Education (FARE), "32 million Americans have food allergies, including 5.6 million children under age 18. That's one in 13 children, or roughly two in every classroom...[and] about 40 percent of children with food allergies are allergic to more than one food."

We've curated this collection of resources to help you help your pediatric patients and their families to navigate and manage food allergies.

BEYOND THE BASICS: ADDRESSING GI INTOLERANCE IN THE ICU

In this continuing education program—originally presented as a webinar in February 2020—Kelly Tappenden, PhD, RDN, shares her expertise on GI intolerance in the critical setting.

You'll learn the clinical characteristics and mechanisms of action of GI intolerance in the ICU; review evidence-based approaches on how to care for ICU patients with GI intolerance; and learn methods for tailoring nutrition interventions for these patients.

FREE continuing education: 1.0 RN CE/RD CPEU

Looking for more information? [This infographic](#), developed in collaboration with Dr Tappenden, serves as a resource for healthcare professionals seeking guidance on critical care nutrition recommendations.
