PROGRAM OBJECTIVES

- Summarize alternative clinical strategies to support opiate-exposed newborns and discuss emerging concerns with substances such as cannabis.
- Describe the essential elements of a post discharge feeding plan in the term, late preterm and preterm infant.
- Discuss the use of evidence-based protocols to prevent and manage diaper dermatitis in substance exposed newborns.
- Discuss the results of the NIH’s BEGIN (Breastmilk Ecology: Genesis of Infant Nutrition) project.
- Review the composition of human milk and the impact that length of gestation and environmental contaminants can have on human milk quality.

REGISTRATION

(ONLINE ONLY)

- RN CE credit: 4.5
- RD CPEU credit: Pending
- TUITION: $15

REGISTER ONLINE BY:
JUNE 17TH

This educational activity has been prior-approved by the Commission on Dietetic Registration (CDR). CDR credentialed practitioners will receive the specified continuing professional education units (CPEUs) for completion of this program/material.
Sharon Groh-Wargo  
PhD, RD  

Dr. Groh-Wargo has over 40 years of experience as a neonatal dietitian, is a nationally known speaker and researcher, and has authored numerous publications on neonatal nutrition. She is a contributor to all three editions of the Academy of Nutrition and Dietetics’ Pocket Guide to Neonatal Nutrition and authored a chapter on “Lactoengineering” for the 3rd edition of “Infant and Pediatric Feedings: Guidelines for Preparation of Human Milk and Formula in Health Care Facilities”. She participated in the BEGIN Project – Breastmilk Ecology: Genesis of Infant Nutrition – sponsored by the NIH in cooperation with the Academy of Nutrition and Dietetics, which was convened to investigate human milk as a unique biological system. Dr. Groh-Wargo received the Academy of Nutrition and Dietetics’ Medallion Award in recognition of her professional contributions.

Terrie Lockridge  
MSN, RNC-NIC, C-ELBW  

Terrie is a Neonatal Clinical Nurse Specialist with 35 years of professional practice devoted to supporting newborns at risk. She has experience in many different aspects of neonatal critical care, including ECMO, postoperative cardiac care, neuroprotection, transport, resuscitation, and stabilization. Terrie received her BSN from Saint Anselm College and her MSN from Boston College. She is a member of the National Association of Neonatal Nurses, the Academy of Neonatal Nurses, and the past President of the Pacific NW Association of Neonatal Nurses. Terrie has been a STABLE Program and Neonatal Resuscitation Program Instructor since the inception of both curriculums. Terrie is an accomplished author, having contributed to peer-reviewed journals and textbook chapters. Her special interests include neonatal skin care, pain management, and neuroprotection. Terrie currently works as a NICU nurse at a Seattle tertiary center with nearly 10,000 births yearly, and she brings a practical approach to her educational offerings that combines pragmatic clinical information with the latest in evidence-based practice.
