Juven provides ingredients to support incision healing by enhancing collagen production

Juven is a therapeutic nutrition drink mix that supports wound healing from the inside out

WOUND HEALING: WHAT YOU NEED TO KNOW

Incision Healing

Your body must create new collagen for strong, healthy wound closure

Collagen

Collagen is the most abundant protein in our skin and plays a critical role in healing by creating a matrixed framework that serves as the foundation for wound healing

Nutrition

If your body does not have enough of the right nutrients, you may not be able to produce enough collagen which could lead to delayed wound healing.¹

Provides essential ingredients to support your healing:

Arginine, Glutamine & HMB

In a clinical trial, patients receiving arginine, glutamine, and HMB saw a 67% increase in wound hydroxyproline, a marker of collagen production^{2,3*}

Collagen Protein

Consuming collagen protein has been shown to help stimulate internal collagen production

Vitamins & Minerals

Juven provides vitamins A, C, E, and Zinc which are important for wound healing

* Studied both in healthy elderly and patients with diabetic foot ulcers, taking 2 servings per day, at 2 weeks
